World War II was a world-spanning conflict that engulfed dozens of countries, a maelstrom that dragged nations and religions and millions of people to their deaths.

But it was fought with more than merely guns and machines...

Even before the War was begun in earnest, Nazi Germany had sent expeditions to the darkest hiding places of the world: to shadowed Africa, to the towering peaks of Tibet, and even to the frigid wastes of Antarctica.

Their goal was to locate occult weaponry and "aid" for the glory of the Third Reich.

And they were successful.

But were those they sought truly allies? Or were they the old Gods themselves, waiting for their chance to remold the world of Man in their own image once again?

Asamatsu Ken presents another fantastic novel of the War, the Cthulhu Mythos, and humanity trapped in the middle.

A previous version of one story from this book, "The Continent of Madness," has been published in *Beyond the Mountains of Madness* (Celaeno Press, 2015). The Japanese source has been revised, and will be translated anew for this book.
